

# Issue Pend(o)ing

An AI agent for Salesforce incidents

Richin Mrudul  
Summer on Tapioca

# About Me

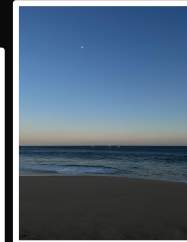

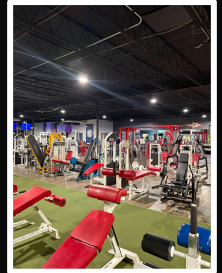

Computer Science + Mathematics @ Purdue

Sacramento, California

Rising Junior

# 29 hours to fix. 16 days to find.

The result of a Sev-1 postmortem

**An external Salesforce  
policy change activated  
a latent bug in our  
integration**

**About 30% of active  
Salesforce sync  
subscriptions were  
affected**

**No alert fired. A person  
noticed.**

# AgentRichin

FROM

## Watching volume

That error was already background noise across the fleet. Aggregate volume never crossed a threshold.

TO

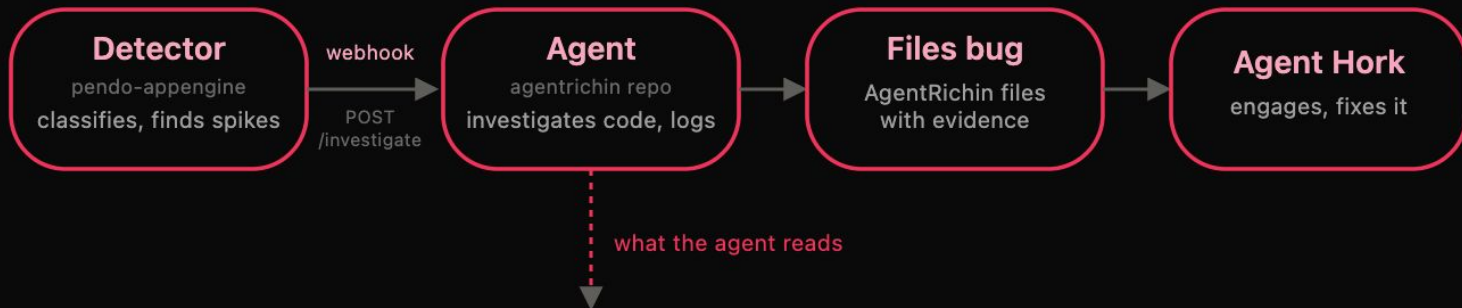

## Watching Pairs

Watch for a pair that's never failed this way before, a subscription failing in a way it never has.

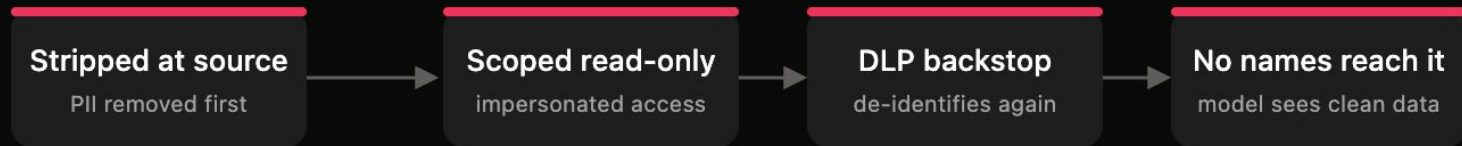

new unit = (subscription × signature), first seen  
threshold = max(floor, 3 × avg of last 5 days)

the loop

the trust boundary

# 16 Days → the next morning

- ★ The detector runs every day. A new failing pair surfaces within about a day of appearing, instead of sixteen.
- ★ The bug arrives with evidence. Root cause, suspect commit, sanitized samples attached. Whoever picks it up starts from evidence, not from zero.
- ★ Usable today, anyone can mention it with a Salesforce question and get a code-grounded, doc-cited answer
- ★ It generalizes, each new connector is a scoped read grant and a bounded query, not a rewrite.

# The rest of the summer

50+ tickets · 55+ PRs · 5 repos

- **Snowflake configurable role** - backend, frontend, and customer-facing docs
- **Prequel append-only** - through backfill GA
- **Data Sync schema-release notifications**
- **Data Sync ops control** - per-app disable, backup timeout fixes
- **Bug fixes and regular ticket work**

# What I learned

Shipping meant talking to security, infra, and IT, the code was rarely the hard part

The worst bugs were config and process, not logic

Handing something off well is part of finishing it

Learning to direct an AI coding partner well was its own skill, knowing what to hand off and what to verify myself

## Thank you, Team Tapioca
